

Kambo Foundation Practitioner Certification Program *Apprenticeship Program Level 1*

I am excited to welcome everyone to this opportunity to study the path of administering the medicine of this sacred Amazonian Kambo frog. In a space of general disappointment and general resentment of many modern medical solutions, which have been known to add problems as opposed to solving them, a new contender has come onto the field to bring healing to humanity in a surprising package:

The phyllomedusa bicolor frog, often referred to as Kambo or Sapo, of the Southern Amazon, is a natural medicinal powerhouse with, according to researchers, “exceptionally high content of active peptides, easily absorbed through the skin.” The powerful bioactive peptides that the phyllomedusa bicolor frog secretes bind readily with human cell receptors and many experience miraculous healing as a result.

It's for this miraculous healing that the movement of Kambo is growing rapidly. People are beginning to see the results others are having following application of the Kambo secretion and try it for themselves. It's not long after that they have family and friends receive kambo application as well. Many, too, are called to practice the application of

Kambo. Kambo Frog Detox, and the Kambo Foundation, which it has founded, has created a 4-Day certification program to support this calling.

Following is an outline of what is offered in the 4-Day Kambo Practitioner Training. You are invited to read through and pay attention to whether you feel resonance with this calling. If you feel called, please reach out to Neal via text at 386.334.3688 to schedule a phone call in order to receive support in making a conscientious decision to follow this powerful and transformative path. We are here to serve you and to serve the Earth, her people, and the frog through this medicine. If you would like to join us in this, we warmly welcome you.

Kambo Practitioner Training

This training is for those with little to no experience applying Kambo. It is a beginner

training that will provide those who graduate with the knowledge, skills and experience to confidently apply Kambo medicine ceremonially. If the apprentice graduates this program, they will receive 1) a certification from KFD, 2) a listing on our website as a qualified Kambo practitioner, 3) an invitation to serve kambo as a practitioner of KFD, 4) a starter medicine kit, and 5) regular access to Kambo medicine harvested by the Indigenous Matsés.

Kambo Foundation Practitioner Certification entails a total of **three separate modules** which encapsulate foundational elements and necessary nuance to, within integrity, safely and effectively apply Kambo.

It's tailored toward individuals who hear the healing call of the Kambo resource and are drawn by an inward desire to practice and heal using this unique gift from the Amazon. It's a certification program for those who wish to become a practitioner with the Kambo

Foundation/Kambo Frog Detox and hold the highest integrity for the medicine and application of the medicine.

The application of Kambo requires skill, knowledge, experience, integrity, responsibility, mindfulness and a deep understanding of this powerful medicine. A trained practitioner will know where, how much and how to treat you, if at all and they will have been trained in techniques that enable them to assess this. If there is a problem, they will know how to deal with this but they are also trained to minimize the possibility of problems and never go beyond the limits of their ability.

During the Kambo treatment there is a transfer of energy from the practitioner to you. The trained practitioner will understand how this process works and how to ensure that only clean and positive energy is passed on to you.

Another important consideration is aesthetics. Trained practitioners will have learnt techniques to enable them to make the access points on the skin, known as gates, with the minimum of pain and scarring. They will also understand the different types of points that are suitable for different parts of the body.

Finally, with a wealth of knowledge and experience that is acquired during and after their training, a properly trained practitioner will enable you to make the most of Kambo medicine on a physical, spiritual, emotional and energetic level. Environment, ability to hold sacred space and hold boundaries, energy transfer, knowledge of anatomy, meridians, chakras, acupuncture points, treatment protocols and a deep connection to the spirit of the medicine born of self-practice will all inform, and elevate your Kambo experience.

Certification Program Module and Outline

Module 1 Application of Medicine (Day 1-2)

Module 1 is composed of training which allows for a practitioner to self administer the Kambo as well as facilitate the medicine directly to the participant in a manner that is rooted in theoretical and practical technique for applications that are tailored towards the individual client's specific needs.

Two Sessions of Kambo will be applied within Module 1

Module 2 Transfer of Energy (Day 3)

Within this second module of training there is an introduction to a variety of special treatments for specific parts of the body utilizing Traditional Chinese Medical guidelines and energy systems (anatomy, meridians, chakras, acupuncture points). Ultimately, Kambo is a specialized tool to be applied carefully, and this practice is engrained in the training of the second module. We will cover medical intakes and contraindications in depth.

Practitioners will learn techniques to enable them to make direct access points on

the skin, known as gates. They will also understand the different types of points that are suitable for different parts of the body.

Module 3 Aesthetics (Day 4)

Kambo is an indigenous medicine that requires respect and integrity. In Module 3 we will learn and apply the “deep connect” to the spirit of the medicine and experience the ability to hold sacred space and boundaries. *One session of Kambo will be applied in Module 3*

Apprenticeship Programming Curriculum:

1. History of the Medicine and Native Applications
2. Cultivating a Relationship with the Sacred Frog
3. Creating and Holding Space
4. Working with Rape', Sanaga, and other indigenous medicine used in the Kambo ceremony
5. Medical Contraindications and Safety
6. Performing Medical Intake
7. Treating Chronic and Infectious Diseases with Kambo
8. Identifying Toxins and Parasites Released from Sessions
9. Test Points and Calculating how many to apply
10. Frog Sleep and the Resetting of the Somatic Nervous System
11. Considering Various Body Types and Constitutions
12. Preparations for Ceremony
13. Nutrition and Supplementation
14. TCM (Traditional Chinese Medicine) mapping system relating to kambo
15. Liability, Insurance and Medical Release Forms
16. Working in Correlation with Kambo Frog Detox and the Kambo Foundation for research and development.

Location:

Ormond Beach, Florida

Boulder, Colorado

Hood River, Oregon

Apprenticeship Programming Schedule:

April 20th to 23rd Florida

May 26th to 29th Colorado

June 2nd to 6th Oregon

June 23rd to 26th
